EDUCATION

Graphic Era Hill University

B.Tech, Computer Science & Engineering — CGPA: 7.2

08 2023 – 08 2027

Dehradun, India

Shivedale School

12th Standard — 82%

04 2021 – 04 2022

Haridwar, India

EXPERIENCE

Data Science Intern — Prodigy InfoTech

01 Jul 2026 – Present

Remote | Python, Pandas, NumPy, Matplotlib, Seaborn, Folium

- Delivered 3 end-to-end data analysis projects: Titanic EDA (univariate/bivariate/multivariate + correlation heatmap), World Bank population distribution analysis across 217 countries, and a 500,000-row US Traffic Accident study with weather, road, time-of-day, and severity insights.
- Built an interactive Folium heatmap to visualize accident hotspots and communicated findings through clear, professional data visualizations.

PROJECTS

Bioverse – Emergency Health Passport (EHP)

April 2025

HTML, Tailwind CSS, JavaScript, QR/NFC, PWA

- Developed an offline-accessible health app that shares patient info via QR/NFC in emergencies with dynamic UI and secure storage.

Data Science Projects — Prodigy InfoTech

2026

Python, Pandas, NumPy, Matplotlib, Seaborn, Folium

- Titanic EDA: cleaned data and analyzed survival trends by class, age, and gender using multivariate analysis and correlation heatmaps.
- Population Analysis: visualized categorical/continuous distributions across 217 countries; compared linear vs. log-scale population data (1960–2024).
- Traffic Accident Analysis: processed 500K accident records and built an interactive Folium heatmap to surface hotspot patterns.

Secure Digital Voting System

May 2025

MERN Stack, Blockchain, JWT, MongoDB

- Designed a secure voting platform with user/admin authentication, encrypted vote storage, and dynamic 3D UI.

Smart Railway Network Optimization

June 2025

React.js, Node.js, MongoDB, Graph Algorithms

- Implemented Dijkstra, Kruskal, and Ford-Fulkerson algorithms to optimize train routes and congestion; integrated live route maps with satellite view.

RESEARCH & INNOVATION

BioVerse Lifelink Catalyst — Wearable Health-Tech Research

Ongoing

- Designing a wrist-worn device and PWA storing emergency medical data offline via QR/NFC; prototyping AI models for vital-sign prediction. Provisional patent filed (May 2025) for biometric-secured, AES-encrypted contactless data access.

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, SQL

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Folium, Data Cleaning, EDA, Statistical Visualization

Frameworks/Tools: ReactJS, NextJS, NodeJS, ExpressJS, MongoDB, Git, GitHub, Linux, VS Code, Android Studio

Core CS: DSA, OS, DBMS, Computer Networks, Software Engineering, OOPs, API Development, Microservices, CI/CD

ACHIEVEMENTS & EXTRACURRICULAR

- NSS Volunteer — actively participated in National Service Scheme community service initiatives, including social awareness campaigns, cleanliness drives, and outreach programs.
- Filed a provisional patent for the BioVerse Lifelink Catalyst wearable health-tech device (May 2025).

CERTIFICATIONS

- Deloitte Virtual Internship (Consulting Track), Forage • Skillforce Virtual Internship
- A Deep Understanding of AI Large Language Model Mechanisms — Udemy (Transformers, Tokenization, NLP)
- AI and Python Development — Udemy
